NOSE CANDY VANILLIN

***NEW* OLFACTORY BLOCKERS**

Tink's® Vanillin Nose Candy uses wood-derived vanillin to create a natural sweetness that helps block human odor and blend into forest surroundings. Its long-lasting gel stream forms a focused scent barrier that softens odor detection and sparks deer curiosity.

WHAT IS AN OLFACTORY BLOCKER?

It's a scent compound that interferes with a deer's ability to smell. Instead of simply covering scent, it has an intensity that overwhelms a deer's nose, making it harder for the animal to pinpoint a hunter's presence.
